

BURROWING

OWL

CENTRAL NEW MEXICO AUDUBON SOCIETY, Albuquerque, N. M.

February-March 1979

CALENDAR -- FEBRUARY & MARCH

Monday Feb. 5 ALBUQUERQUE ACADEMY PROGRAM (free) -- on Birds of Prey, 6400 Wyoming, NE at 7:30 P.M. in the auditorium. A 12-min. film on the Snake River Birds of Prey Natural Area in Idaho and a talk given by Dr. Phillip Shultz will be presented. More information from Roger Kirkpatrick, 821-1125.

Thursday Feb. 15 REGULAR MEETING of the CENTRAL NEW MEXICO AUDUBON SOCIETY, 7:30 at St. Timothy's Lutheran Church, Copper & Jefferson NE. Program: a round table discussion on RARE II (Roadless Area Review and Evaluation) by representatives from the U.S. Forest Service, the Wilderness Society, and the Timber Purchasers Association.

Saturday Feb. 17 FIELD TRIP on snowshoes to the Jemez Mountains. Meet at 7 A.M. at Goodwill Industries, 5000 San Mateo NE. Notify leader, Dave Lange by Thursday, February 15. He has details on renting snowshoes, ph. 266-4420.

Wednesday Feb. 21 AUDUBON WILDLIFE FILM, 7:30 P.M., UNM Popejoy Hall. Two films: "Northwest Adventures" and "Adventures in Penn's Woods" will be personally narrated by Tom Diez. Highlights are backpacking in the Canadian wilderness and a visit to Hawk Mountain, Pennsylvania.

Saturday Feb. 24 FIELD TRIP to Petroglyph State Park and the Albuquerque Volcano area. Meet at 7 A.M. at the UNM Physics & Astronomy Bldg., Lomas & Yale, NE. Chestnut-collared longspurs have been seen in the area. Leader: Barbara Hussey (268-6547).

Thursday March 1 BOARD MEETING, 7:30 P.M. at the home of Alana and Chuck Gallagher, 415 San Pablo NE phone - 255-7748.

Thursday March 15 REGULAR MEETING of the CENTRAL NEW MEXICO AUDUBON SOCIETY, 7:30 P.M. at St. Timothy's Lutheran Church, Copper & Jefferson NE. The program: a film entitled "Birds in Our Lives"

Saturday March 17 FIELD TRIP. Dustin and Sue Huntington, 831-5755, will lead us up Sandia Crest as far as we can go without encountering deep snow. Meet at 7 A.M. at Western Skies Motel, 13400 Central S.E. Call by Thursday, March 15 if you plan to go.

Sunday March 18 DEADLINE for the April-May issue of the Burrowing Owl. Send copy to editor, Barbara Hussey, 2068-B Mercury Dr. SE, 87118 (268-6547)

Saturday March 24 Annual meeting of the NEW MEXICO ORNITHOLOGICAL SOCIETY at the UNM Biology Bldg. Open to the public. Details available after March 1 from Dot DeLollis (299-5384) or Ross Teuber (265-8962).

Saturday March 31 FIELD TRIP to Shady Lakes and the Alameda bosque. Meet at 7 A.M. at the UNM Physics & Astronomy Bldg., Lomas & Yale NE. Leader: Mary Alice Root, (office 277-3411 or home 266-0561)

Sunday April 1 AUDUBON WILDLIFE FILM, 7:30 P.M. at UNM Popejoy Hall. Eben McMillan presents "Land that I Love" a story of a pioneer scout who finds problems when the abundant wildlife is threatened by settlers' herding and farming practices.

Thursday April 5 BOARD MEETING at the home of Mary Alice Root, 1108 Columbia Dr. NE (266-0561)

Tuesday April 10 Another WILDLIFE FILM, 7:30 P.M. at UNM Popejoy Hall. Richard Fitch will personally narrate "North By Southwest -- Evening in Canada"

Saturday April 14 FIELD TRIP to Bosque del Apache National Wildlife Refuge. Meet at 9 A.M. at refuge headquarters. Leader Bob Jost (292-3625) hopes the shorebird migration will be good. Call him by Thursday, April 12, if you plan to go.

COMING ATTRACTIONS

Late April -- Field trip to Priest Canyon in the Manzanos.

Early May -- Field trip to the Four-Corners area.

HELP WRITE BIRD FEEDING BOOK

Four-page questionnaires are available to those who are interested in helping the authors write "the definitive book on bird feeding." If you feel you have valuable bird feeding information to share, contact Ross Teuber at 265-8962.

The President's Corner

Two weeks ago Dede called me with regard to the 1980 regional meeting. The 4th to 11th of June 1980 was picked as the dates for the conference which will be held at Ghost Ranch. As announced in the last Owl, our chapter will be the host chapter for this meeting. Though the regional office will be responsible for the workshops our chapter will be responsible for field trips, registration, baby-sitting, transportation, travel information and an art exhibit and sale. If you would like to help with any aspect of the meeting please let me know. Our plans are to have a meeting very similar to the Rocky Mtn Regional held this past summer in Sierra Vista.

By the 1980 meeting I would like to see our chapter along with the other Audubon chapters in the state develop a list of good birding localities within New Mexico. What is needed is information on birding localities for general birding as well as for specific species such as the mtn. plover and northern three-toed woodpecker. With a little help from you this could result in a small book such as Lane's guide to SE Arizona. All contributions will be graciously acknowledged.

Be keeping a close lookout on the State legislative session. I know of two bills which are of keen interest. First is the beverage container bill which is discussed elsewhere in this issue. And the second is the nongame wildlife bill which would extend the jurisdiction of the State Game Commission to nongame wildlife and define "endangered" and "threatened" species as they are defined by federal statutes.

In the next couple of months two important draft environmental impact statements will be coming out. One by the Corps of Engineers on flood control alternatives for the Rio Grande flood plain from Bernalillo to Belen (see article in this issue). The second is for the WIPP project.

If you desire more information or have input on any of the above, please contact me.

Dave Lange

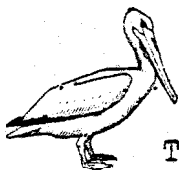

NOMINATION TIME AGAIN!

Dan Washburn, phone 266-3078, has accepted the chairmanship of the Nominating Committee and states that nominations are now open for the following offices:

- One year terms - President
- Vice President
- Recording Secretary
- Corresponding Secretary
- Treasurer

Four year term - Board member

Anyone wishing to run for office, of having a nomination to make -- or just wanting information -- is invited to call Dan at 266-3078. All nominees must have consented to run for that office.

FIELD TRIP REPORTS

The bus trip on December 2nd was a success with 47 people attending. Chris Olsen, Outdoor Recreation Planner at Bosque del Apache guided the tour of the refuge aboard the bus. Despite windy conditions, 25 species were seen and photographed including western grebe, eared grebe, white pelican and whooping crane.

The eagle count on January 20th was led by Ross Teuber (three people participated). The route covered included Moriarty to Corona to Carrizozo and then to Encinosa (north of Capitan) for a total of 380 miles. During the 12-hour count, 4 bald and 7 golden eagles were sighted. 25-30 other species were seen including 7 kinds of hawks and a great horned owl.

The 5 birders who arrived at Bernardo refuge on January 27th were so disappointed with the birding there they decided to go on to Bosque del Apache. 54 species were seen between the two refuges. Notable species were a pair of hooded mergansers and two common goldeneyes at the south end of the Bosque, and an eastern phoebe. Also seen were an immature bald eagle, numerous snow geese, and very few cranes (no whoopers).

CHRISTMAS COUNT REPORTS

The Sandia Mountains Christmas Bird Count on December 16 turned up 48 species, one additional form and one additional race -- a total of 3366 individual birds. There were 20 field observers in 8 parties and 4 observing feeders. Noteworthy species were three birds never before listed on a Sandia CBC: Canada goose, black-billed magpie, and northern three-toed woodpecker. Participants also discovered a pigmy owl which has been seen only once before on a Sandia count in 1961. Other interesting sightings were: pine grosbeak, red crossbill, Clark's nutcracker, and golden-crowned kinglet.

Only 10 people showed up for the Albuquerque Christmas Bird Count on December 23. 56 species were counted including sage sparrow and sage thrasher both near the Juan Tabo Canyon area. Even though they were seen before the count day, no tree sparrows or chestnut-collared longspurs could be found on the West Mesa.

Only 82 species were counted in some of the worst weather ever on the Christmas count on December 30 -- rain or drizzle most of the time -- overcast the rest of the time, despite which we had 22 people participating at Bosque del Apache NWR. Some highlights are swamp sparrow, prairie falcon, merlin, goshawk, common gallinule, 3 whooping cranes and 4 American bitterns (very visible, near the display ponds).

SIERRA CLUB STATEMENT ON THE CORPS OF ENGINEERS' PROPOSED LEVEE PROJECT

The Army Corps of Engineers is currently planning a project to raise the levees along the Rio Grande from Bernalillo to Belen to provide protection for a flood expected to occur only once every seven hundred years. The project to be recommended by the Corps calls for the complete reconstruction of the levees in the Bernalillo, Corrales, Mountain View, Isleta and Belen areas and the adding of fill to the tops and sides of the levees in the Albuquerque area.

The Sierra Club has some serious doubts about the need for the project and is very concerned about its serious adverse environmental effects.

As recently as 1976 the Corps stated that the levees in the Albuquerque area provided adequate protection from floods. The Albuquerque area levees currently are sufficient to provide protection for a flood expected to occur once every 250 years. On this proposed project, however, the Corps has raised the level of "adequate" protection to protection for a flood expected to occur once in 700 years. This change in the Corps' policy raises serious questions about whether the Corps is continuing to raise the standards for adequate levees primarily to provide continued work for its employees. This proposed project will be lucrative for the Corps: The Corps itself estimates that the project will cost taxpayers \$40 million, \$8.5 million of which would have to be provided entirely by state and local taxpayers.

In an analysis of the effects of the Corps' project released in June of 1978, the United States Fish and Wildlife Service estimated that the project recommended by the Corps is expected to destroy a total of 760 acres of riparian woodlands, 281 acres of which would be adjacent to the existing levees and would be permanently lost.

The destruction of these woodlands would cause the loss of a wide variety of wildlife, including quail, pheasant, raccoon, beaver, coyote, and foxes. The haul roads created by the project would have an additional adverse impact on the surviving wildlife. In addition, the destruction of these woodlands would greatly reduce the use of the river as a flyway for migratory birds. The Rio Grande is currently one of the few such flyways in the Southwest.

Some action does need to be taken to prevent the continued aggradation - or rising - of the river bed, a process largely caused by earlier Corps projects. The construction of the Cochiti and Jemez dams by the Corps has severely restricted the flow of water in the Rio Grande below those dams, and this has caused silt to accumulate and to raise up the river bed. Thus the river bed in some areas is now -- or may soon be -- higher than the land outside of the existing levees. Higher levees will only aggravate this problem. This problem can be solved by controlled flooding to scour out and thus lower the river bed. The Corps apparently has not even seriously considered this alternative to the levee project.

The Corps of Engineers is planning to release a draft environmental impact statement and a technical "report" on this project on February 2, 1979. It is planning to hold a public hearing on the issue on March 5, 1979.

The Sierra Club will be following the planning for the project closely and strongly encourages other concerned groups and individuals to do likewise and to express their opinions to the Corps of Engineers and to their Congressional representatives. (Addresses on page 6.)

For more information, call Kevin Reilly after 6:00 P.M. at 255-9735.

BOTTLE BILL FOR N.M.

State Representative Ruby V. Appleman of Albuquerque is sponsoring a beverage container bill during the 1979 legislative session. The N.M. Legislature defeated such a bill in 1977. Surveys indicate most New Mexicans favor the bill. If it becomes law, at least a 5¢ deposit would be required on all beer and soft drink containers sold in New Mexico and would ban removable pull tabs, & plastic six-pack rings. The bill would also provide for redemption centers and allow retailers to receive a 20% handling fee.

It is important that the members of the N.M. Legislature hear from those in favor of the bill -- it is certain that those opposing it will be contacting them. (See names and addresses page 6.)

Tom Diez

"Northwest Adventures" and
"Adventures in Penn's Woods"

Tom Diez presents two 40 minute films which are a pure invitation to backpack in the wilderness. *Northwest Adventures* takes you through the bush country of British Columbia, Alberta and the Yukon and from southern Alaska to islands of the Bering Sea. A remote and spectacular wilderness. Pennsylvania is the setting for *Adventures in Penn's Woods*. Areas visited include Hawk Mountain Sanctuary and featured are stories on trout fishing and a remarkable tale about a man and a herd of deer in the mountains of Potter County.
7:30 P.M., UNM Popejoy Hall

ZOO NEWS

BE A WILD WEEKENDER! The whacky world of the Wild Weekenders begins with a Wild Weekender Welcome on February 10th at 1 P.M. in the Rio Grande Zoo Administration Bldg. All interested adults are invited to a presentation (refreshments served) where you will learn what it takes to be a Wild Weekender -- giving short tours to the public on Saturdays or Sundays at your convenience. Wild Weekenders will take short 3-session training workshops to learn the wonders of the mighty hooped stock (giraffes, rhinos, etc.) or the new Tropical Rainforest full of exotic birds and other small creatures, or the Reptile House, soon to be the best in the U.S.: No previous experience is needed. Training sessions start February 24th at 10 A.M. at the zoo and will be held on Saturdays only. For more information call Sandy Ward at 281-5233. For the Wild Weekender Welcome reservations call 281-5233 or 897-2295.

BOOK REVIEWAdventures in Birding by Jean Piatt

This is a warm and witty book. It concerns the tribulations and triumphs of making a life list, from number one, the Towhee, observed in a Pennsylvania woods, through more than six hundred birds sighted all the way from the Florida Keys to Alaska.

You are there in the futile hunt for the Ivory-billed Woodpecker in the Big Thicket of Texas, and also there when a pair of Spectacled Eiders were pointed out by an old Eskimo guide named Kopanuk.

The Piatts have made most of the trips you and I would make if we had the time and the money. Since most of us can't make these trips, the next best thing is to read about them -- watching for a Condor on a California mountain top, and spotting four Ringed Turtle Doves in Olivera Street in Los Angeles.

In addition, I learned much that I did not know about birding organizations and the rules of birding.

And finally I believe you will enjoy the adventures and people they met along the way.

About the author: Jean Piatt is Professor of Anatomy in the School of Medicine of the University of Pennsylvania. His hobby (shared with his wife Marybelle) is birding. When this book was published in 1973 they were in a three way tie with Roger Tory Peterson for fourteenth place among the birders of the 600-Club.

Betty Sauter
 Editor's Note: Adventures in Birding is available at the monthly meetings from the CNMAS library.

N.M. FRIENDSHIP FORCEGreat Opportunity for Foreign Birding

The date has been set for the 1979 New Mexico Friendship Force cultural exchange program. On June 10 through 22, 385 "goodwill ambassadors" from Albuquerque will stay in the homes of participants in a foreign country, not yet announced. At the same time the same number of "ambassadors" from that country will stay in host homes here in Albuquerque.

The cost for the trip is \$330 for 12 days. Every effort will be made to match ambassadors and hosts by their work or other interests. Bert Lindsay, Friendship Force New Mexico Director has explained that anyone interested in birding or natural history will very likely be visiting birders and nature lovers in the host country.

The idea was initiated by President Carter to promote peace through personal friendship. So far there have been 18 exchanges between the U. S. and other countries in all parts of the world. This will be Albuquerque's first exchange.

For more information contact the Friendship Force, 206 3rd, S.W., Albuquerque (243-6916). Call Bert Lindsay (299-7454) if you are interested in being a "birding ambassador" or host.

AUDUBON CAMPS

Time to start making plans for summer vacation. Members who do not have young children might consider the Audubon Ecology camps in Wyoming, Wisconsin, and Maine. Each offers four 12-day sessions during the period from July 1st to August 24th. There are daily field trips led by experienced instructors and opportunities for study of birds, plants, environment, etc., while meeting like-minded people from all parts of the country. College credits are given.

The cost for each 12-day session is \$375, which covers all expenses. Single people share cabins with other campers. Couples occupy private rooms. All share bath facilities. No tents or trailers are allowed. The camps are for active people age 18 to 69, though older people are accepted if they can participate fully.

The Wyoming camp is near Dubois and the Wind River Mountains. The Wisconsin camp is 117 miles northeast of Minneapolis. The Maine camp is on an offshore island 60 miles northeast of Portland. Call Dot DeLollis at 299-5384 if you would like a brochure or pick up a brochure at the February meeting. Members of CNMAS have attended each of these camps and can answer questions.

Audubon also sponsors summer 4-week workshops at facilities in Greenwich, Connecticut, 35 miles from NYC. Brochure are also available for these.

ROSS'S RAVIN'S

Greetings from the land of the whooping crane, roseate spoonbill, Louisiana heron and the Ivory-billed Teal. (You don't know it? -- I was just introduced by an intrepid Miami Beach birder.) I won't bore you with all the involved details, but you may be interested in knowing the current status of this endangered species -- the whooping crane, not the ivory-billed teal. The total known world population of whooping cranes at this time is 109 individuals. Of these, 74 are in the natural flock that winters here at Aransas. Eight youngsters have arrived so far this fall and winter, but four of the grown birds that were here last year did not return. To this number we must add the 23 captive birds at Patuxant, Maryland; the eight (possibly nine) young birds from the foster parent program; and four captive birds, two at the International Crane Foundation, Wisconsin and two in zoos. Thus the total of 109 birds.

Reports of local sightings, other than the Christmas Bird Counts have been slow coming in. Don't be shy, if you saw something that was interesting to you it will probably be interesting to others. If you aren't sure what you are seeing, give me a call, and I'll do my best to help you. Call me anyway to report sightings at 265-8062. I'll listen! We did hear of a Lewis' woodpecker and a curve-billed thrasher at Sandia Park the first week of December. They didn't show up in the Christmas count, but a Pigmy owl was seen at Cienega Creek, a northern three-toed woodpecker was seen at the Crest, and a black-billed magpie out North 14. All of these were unusual at these places or times. Of course, the phone lines were kept hot with reports of the two golden eagles feeding at the roadside on North 14

WASHBURN AWARD NOMINEES NEEDED

Again this year our chapter hopes to bestow the Warhburn Award on a federal, state or local government employee in New Mexico who has been actively involved in conservation and wildlife preservation.

Established in 1976 to honor Dan and Marian Washburn for their service to CNMAS, the award went to Dick Rigby in 1976 and to Gary Zahm in 1977 both former employees at Bosque del Apache National Wildlife Refuge. In 1978 the award went to Dan Pursley of the New Mexico Department of Game and Fish for his work in setting up "Operation Game Thief."

The award, if given, will be presented at the CNMAS annual meeting, May 17, 1979. Nominations of qualified government employees will be accepted in writing, stating reasons, at P. O. Box 30002, Albuquerque, N.M. 87190

a short distance north of San Antonio. I'm wondering if anyone has gone to the Sandias to try to find the goodies seen on the count, or to check whether the cold and storm has brought down any rosy finches or other rarities? Some of the people on the bus trip to Bosque del Apache on December 2, also saw a western grebe. Reports of sightings since the first of the year are nil. Surely someone has been birding and seen something!?!?

Would anyone be interested in a little friendly competition, like publishing the names and annual list totals in each issue of the Burrowing Owl of the 3 or 5 people who have the longest current list of sightings, local (state) and overall for the year? If so give me a call about the middle of March and let me know where you stand. Most of you can probably beat me, I have only 6 species in New Mexico so far this year (as of 1/18).

Remember now is the time when we need to be conscientious and regular about providing feed and water for the birds. Normally the worst part of the winter hits during the next few weeks. Birds need water equally with feed, and leaving an outside faucet trickle (put a shallow container under it) is not only attractive to the birds, but helps keep the pipes from freezing in severe cold conditions. Remember that different birds feed at different levels; juncos, towhees, white-crowned sparrows on the ground; some kinds of sparrows, goldfinches, chickadees, grosbeaks and many more at windowsill or standing or hanging feeder height; and woodpeckers, nuthatches, and creepers on tree trunks. All kinds like at least some suet in winter, and if you have feeders going when severe weather hits you have a better chance of attracting our irregular winter visitors such as evening grosbeaks, Bohemian waxwings, Clark's nutcrackers and who knows what? We can't guarantee that we'll get all of them, but if we don't make an effort to attract them we're sure to miss them.

By the time for the next Burrowing Owl, we'll be on the verge of the spring migration, and looking forward to the arrival of the birds we've been missing all winter. In the meantime, when you're traveling, keep your eyes peeled for the appearance of winter hawks and eagles. When they become scarce, except for red-tails and kestrels, it's time to start looking for the first spring arrivals.

Oh yes, about that ivory-billed teal --- it's nothing new, all of you have seen it, I'm sure, but you know it by a different name. Look it up in your field guides under its scientific name, *Fulica americana*. Isn't it fun to be fooled? See you next time, so long and good birding.

RARE BIRD ALERT REORGANIZATION

NATURE WALKS AT "BOSQUE"

CNMAS is now taking names of all those interested in being notified of the local occurrence of unusual birds. Participants will receive a copy of the complete telephone chain -- each person must be willing to make two or three calls to pass along the information received no matter how rare the bird seems to him!

If you are interested, call Barbara Hussey, 268-6547 or Joanne Phillips, 898-2568. We hope to have the chain set up in time for spring migration.

Chris Olsen, Outdoor Recreation Planner at Bosque del Apache National Wildlife Refuge (P.O. Box 1246, Socorro, N.M. 87801) has informed our chapter that refuge naturalists will be conducting nature walks on February 10th and 24th (Saturdays). The walks will begin at 10 A.M. at the "North Trail" on the refuge. The 2-hour walks will include identification of wildlife tracks, snow geese, sandhill cranes, and will offer information about the refuge and its wildlife.

Reservations must be made by calling the refuge (1-835-1828) Monday through Friday from 7:30 A.M. to 4 P.M.
