

BURROWING OWL

CENTRAL NEW MEXICO AUDUBON SOCIETY

JUNE - JULY 1989

WELCOME!

The Central New Mexico Audubon Society meets on the third Thursday of each month, 7:30 p.m., St. Timothy's Lutheran Church, 211 Jefferson NE (corner of Copper and Jefferson, NE). Nonmembers are welcome at all meetings, fieldtrips, and special events.

UPCOMING PROGRAMS BY DR. CELESTYN BROZEK

ANIMAS NATIONAL WILDLIFE REFUGE (GRAY RANCH)

—Thursday, June 15th

The fate of Gray Ranch, which may become Animal National Wildlife Refuge, is a priority issue with Audubon activists in New Mexico. Gray Ranch, a 323,000 acre piece of property, is located in the botheal of New Mexico. What is happening in the efforts to protect this highly diverse and unique ecosystem? Will it be included in the national refuge system? Join Charlie Ault, an Ascertainment Biologist with the U. S. Fish and Wildlife Department, to acquaint yourself with this important issue. Please note also that David Henderson, of the Randall Davey Audubon Center in Santa Fe, is trying to arrange a trip to Gray Ranch in September. Watch upcoming issues of the **Burrowing Owl** for further details.

NATURAL HISTORY OF THE ACORN WOODPECKER —Thursday, July 20th

Dr. Peter B. Stacey devoted many years of his research to Acorn Woodpeckers. This species was the subject of his Ph.D. thesis at the University of Colorado. His long-term studies, carried on also in Water Canyon near Socorro, resulted in publications in many journals, including **Science** and **Scientific American**. Presently, he is a professor in the Biology Department at the University of New Mexico.

The Acorn Woodpecker is a fascinating bird, living in groups with unique social structure and maintaining huge food storages. Dr. Stacey will present exciting details about Acorn Woodpecker life, illustrating his talk with slides. Come with your family and friends!

SANDIA MOUNTAIN DISCOVERY DAYS —July 29th - 30th

Join two days of fun activities all over Sandia Mountain with displays, demonstrations, storytelling, and appearances by Smokey the Bear at the Sandia Peak Ski Area's Day Lodge from 9:30 a.m. to 5:00 p.m., both days. Bring a picnic, or buy food at the ski area. No admission charge! Complete schedules will be available at the ski area on the 29th and 30th, or call Neel Marsh, Sandia Ranger District, 281-3304, in Albuquerque, or 800-284-2282, in or outside of New Mexico.

CNMAAS volunteers are needed to lead small groups of birders on short walks any time of the day, either day. Please call Donna Broudy, 242-7108, if you can help.

**FIELD TRIP SCHEDULE
BY LAURA JENKINS**

For out-of-town trips, please call Laura Jenkins (293-7527) for an update on any change of plans.

THURSDAY MORNING BIRDING

For information on the Thursday morning birding group, please call Tamie Bulow, 298-9116.

**BIRDS AND BREAKFAST—TREE SPRING TRAIL,
SANDIAS**

—Saturday, July 15th

This trip is a short, easy hike up Tree Springs Trail in the Sandias to the rock pile, where we will settle in with our coffee and breakfast snacks to watch woodpeckers, and whatever else comes by. You may return home from the rock pile, or continue further up the trail. The crest is about 2 hours up, 1 hour down.

Bring food (no cooking fires) and beverages. Meet at 6:45 a.m. at Four Hills Shopping Center, north side, along Central, West of the Tramway intersection.

CANADA BONITA GRASSLAND, JEMEZ MOUNTAINS

—Saturday, August 5th

Grass and a profusion of wildflowers in a mountain meadow at 9800 ft above Las Alamos, near the ski area, will be the focal point of this trip. If time allows, a short hike to the lookout over Valle Grande will be included. Return the same day, or camp, on your own, at Camp May, nearby. Restrooms and covered picnic tables are available, but there is no water or electricity in this beautiful setting.

To reach the area, turn west at the stoplight at the Los Alamos National Laboratory sign. Go about one mile and turn right just past the brown Recreation Area sign. Watch for the ski symbol. Follow a good mountain road to the Pajarito ski area and park on the left. Meet at 10:30 a.m. Camp May is a short distance further. We will hike two miles, round trip, on a good road with a gentle grade. Bring food, beverages, and rainwear.

**RESULTS OF THE 1989 GILA RIVER SPRING
MIGRATION COUNT (BIG BIRD BASH)**

Ralph Fisher, count coordinator, wants to thank all who took time to come to Silver City to do the count and hopes to see everyone again next year. He says it will take some doing to beat this year's total, especially if the drought continues and if good habitat continues to disappear. A total of 168 species (6739 birds) were counted. The total species since the count inception is 260. New species included Baird's sandpiper, Eastern bluebird, Nashville warbler, and Swamp sparrow. New highs were recorded for Great blue heron, Bufflehead, Common merganser, Least sandpiper, Rock dove, Black-chinned hummers, Cassin's kingbird, Bank swallow, Cliff swallow, Warbling vireo, Yellow warbler, Yellow-breasted chat, Northern oriole, Summer tanager, Lark bunting, and Lark sparrow. Extreme low numbers were recorded for the Violet-green swallow and Rough-winged swallows. Plus, only one roadrunner and one Golden eagle were recorded—very sad indeed.

A total of 51 observers covered 11 routes, as listed below:

1. Ross Teuber, Jim Karo, Jane Cox, Sei & May Tokuda.
2. Tom & Carlin Jervis, Gregg Whipple.
3. Dale & Marian Zimmerman, Barbara & Wiley Peebles.
4. Harvey & Ruth Williams, Miriam Weber, Tony Davis, John Chambers.
5. May & Stuart O'Byrne, Victor Moitoret, Albert & Marjorie Hagen.
6. David & Mayetta Clawson, Sarton Williams III, Karen Copeland, Peggy & Charles Bailey.
7. Chris Rustay, Larry Gorbet, David Henderson, Evan Spiegel. (High count party with 94 species).
8. Steve & Orien McDonald, Janet & Jay Hammel, Moses Stamler, Madge Slavec.
9. Pat Insley, Lew Helm, Cap Naegle, Elma Leigh, James Landreth, Jack Devoe.
10. Hiram & Annette Parent, Dennis Murati.
11. Ralph Fisher, David Cleary, Terry & Marjorie Williams.

ANNUAL MEETING UPDATE

May's annual potluck meeting was enjoyed by all. Thanks go to Jean Davis for coordinating the dinner and to Ethel Ringer for bringing containers for the flowers donated by several members for the tables. Ethel usually brings wildflowers from her garden, but the weather played tricks this year--most of the wildflowers boomed early!

A new Board of Directors was announced and are listed in the CNMAS DIRECTORY on page 7. Two vacancies remain: A Recording Secretary, who takes minutes at the monthly board meetings, and an Audubon Council Representative, who attends meetings of the New Mexico Audubon Council. If you would be interested in filling either of these slots, please contact any Board Member.

Our thanks go to several individuals who are leaving the Board. Their efforts have been greatly appreciated and will be missed: Celestyn Brozek, Vice President and Program Chairperson; Jean Dilley, Recording Secretary; Ethyl Ringer, Greeters Chairperson; Lillian Tenopry, New Mexico Audubon Council Representative; and Circulation Chairperson, **Burrowing Owl**, Elizabeth Broemel. Thanks to all of you!

**MEMORIAL NOTES**

CNMAS' Memorial Fund provides part of the endowment to send local teachers to Audubon Camp of the West each summer. We gratefully acknowledge the memorial contribution of Mr. Termaat in honor of James Park.

CNMAS has lost a good member, Terrence Word, who passed away recently. Our condolences go to his wife, Lila Word.

The Words have been active on the **Burrowing Owl** circulation committee for several years. Their contribution to that effort will be missed.

CNMAS LIBRARY BOOK INVENTORY

We will be conducting an inventory of the books in our library in June. If you have any books checked out, please return them by the June meeting. Thanks!

**CNMAS SCIENCE FAIR WINNERS**

Six winners were selected this year--three at the Senior Division and three at the Junior Division. The winners are:

1st Place, Senior: Andrea Allen, El Dorado High, whose project was "The Optimum Habitat for Aneides hardii" (a type of mosquito)

1st Place, Junior: Frederick Melendres, Jefferson Middle School, whose project was "Pesticides Affect Nitrogen-Fixing Bacteria."

2nd Place, Senior: Megan Russell, Albuquerque High, whose project was "Rio Grande Coliform Contamination."

2nd Place, Junior: Daniel Leckman, Jefferson Middle School, whose project was "Can Pillbugs Help Solve Crime?" (counting the number of pillbugs under dead things to determine how long the "thing" had been dead).

3rd Place, Senior: Elisa Garcia, Rio Grande High School, whose project was "Yuck! What's That? A Study of Owl Castings." (studied a Barn owl near her home).

3rd Place, Junior: Stacey Olson, Immanuel Lutheran, whose project was "Which Color Do Hummingbirds Prefer?"

We congratulate all the winners!

CONSERVATION NOTES BY LEW HELM

Drowning in Trash

We Americans throw away enough in one day to fill 63,000 garbage trucks. This country produces more municipal solid waste per capita than any other country. Eighty percent of our trash goes into landfills, but the capacity to dispose of all this waste has dwindled. Here in New Mexico, cities and counties are rushing to close landfills in anticipation of tough new state regulations.

Two efforts in Albuquerque bring a ray of hope that something can be done to lessen the amount of trash going to landfills. First, the City of Albuquerque has started a pilot program in several neighborhoods whereby residents can separate materials which can be recycled, i.e. paper, aluminum, and glass. Early reports are that there is a fairly good acceptance of this so-far voluntary effort. The goal is to have this program expanded city-wide and to make it mandatory. The second effort has not yet gotten off the ground. A bill has been introduced before the City Council to require food stores and fast food restaurants to switch to biodegradable bags or boxes which will break down in city landfills. At present, the plastic bag so common at food stores and the high-tech plastic foam boxes and drink containers at fast-food places threaten to clog landfill disposal because they do not disintegrate. These efforts need to be put into high gear. It is suggested that letters to your City Councilor and the Mayor are in order, urging action. In the meantime, ask for paper bags at food stores (or take your own food carrier, like folks in many other countries in the world) and tell the fast-food places to "shape up!"

Gray Ranch Future in the Balance

Could this be the year that Federal acquisition of the Gray Ranch, located in the New Mexico Bootheel, be approved or die? While we have some hopes that Senator Jeff Bingaman will be able to swing enough votes for approval, we need to keep the pressure on. Write to our Congressmen and Representatives urging full support for Senator Bingaman's efforts. This is a priority item for all Auduboners to act upon. Keep those letters, cards, and telephone calls going to our leaders!

Alaska Oil

The tragic oil spill in Prince William Sound was an accident waiting to happen. Before Prudhoe Bay oil development and transport was approved, the oil companies promised the sky, saying that safeguards would be in place to prevent significant oil spill pollution. Now we know what a hollow ring those promises had. And the tragedy continues as Exxon and other big producers show an arrogance which is almost beyond belief. Birders around the world watch in horror as the slick moves into the Gulf of Alaska and the puny cleanup efforts are woefully inadequate. The National Audubon Society is in the forefront of new efforts to develop a comprehensive plan to mitigate the present damage and to assure no significant spills in the future.

At present, legislation to open the Arctic National Wildlife Refuge to oil exploration has been stopped short, but only temporarily. Until the Exxon spill, bills were moving steadily through Congress to allow oil exploration. Now, public outrage has stopped the bills' movement, but we can be sure that efforts will be mounted in the future as the furor abates. Now is the time to be ever watchful and to get out views to our Senators and Congressmen, opposing opening of the Arctic NWR to oil development

Two Forks Dam on Hold

ATTENTION, CRANEWATCHERS!

A female whooping crane who migrated to Texas with her first chick was killed by a hunter in heavy fog in January. Aransas National Refuge officials termed this tragic because she could potentially have produced 10 to 15 more chicks during her lifetime.

1989 will be a critical year for the whoopers that winter in New Mexico, whose numbers are down to about 15 from a high of 33 in 1985. Late in the year, a decision is slated to be made whether to continue, modify, or abandon the cross-fostering program that produced these birds.

From the **Sangre de Cristo Audubon Society** newsletter, March, April, May 1989.

1989 NEW MEXICO STATE LEGISLATIVE WRAPUP

—David Henderson

Now that the dust has settled around the Santa Fe Roundhouse, it seems an appropriate time to review how the environment fared in the 1989 New Mexico legislative session. This review will cover the key environmental bills which I followed but represents only a mere drop in the bucket of the record 1,573 bills introduced, and the record 468 bills that passed. I wish I could say that this year's session established a positive trend for environmental legislation and the environment in New Mexico, but that just isn't the case. It is clear, however, that in winning a few (very few), and in losing a few (we will be back!), the environmental community has established itself as a force to be reckoned with and will continue to gain strength in its efforts to protect our environment.

The four bills, which I followed most closely and lobbied on behalf of Audubon (either for or against), were SB 415—"Wildlife and Rangeland Research Act," (Game Ranching Bill), SB 491—"Instream Flow Protection Act," (Conservation Easement Act), and SB 2—"Resource Recovery and Waste Management Act," (Solid Waste Bill). The following is a brief summary of the bills and their outcome in the Legislature. If anyone wishes greater detail on these or other bills, contact me at the New Mexico state office in Santa Fe.

SB 415—"Wildlife and Rangeland Research Project." This bill, better known as the Game Ranching Bill, would have permitted a private landowner to "harvest" the surplus game animals on his or her property and market the wild meat through restaurants and grocery stores across the United States. Keep in mind that the wildlife in New Mexico is a public resource, which means that a landowner would be marketing our wildlife for profit. In order for this project to work, certain game laws would have to be changed or eliminated for those landowners participating in the program. Bag limits would have to be expanded, seasons changed or dropped altogether, and it is likely that

spotlighting or night hunting would be considered. The concerns are obviously far reaching.

As a result of a concentrated effort by many environmental and wildlife groups and the New Mexico Game and Fish Department, this bill was tabled in its first committee hearing, Senate Conservation. The sponsors of the bill quickly returned with a memorial bill which requested the State to ask that a study be conducted to analyze the impacts of a game ranching program. The memorial passed in the closing hours of the session. You can be assured Audubon will be following the progress of the study and will be offering input and expertise.

SB 491—"Instream Flow Protection Act." For years, Audubon has been working closely with other groups to enact meaningful instream flow legislation. It is extremely important, especially considering that New Mexico is the only western state which does not have instream flow protection legislation. This year two instream flow bills were drafted. One, we supported for its broad-based approach to instream flow protection. A second, we opposed, because it was so narrow in scope as to render it almost helpless in protecting flows. Unfortunately, it was the second bill which was introduced, putting Audubon in the uncomfortable position of opposing the bill that, at least in title, looked like something we should support. The key shortcoming in this bill was that nowhere in the act were instream flows recognized as a legal beneficial use. Thereby, now allowing equal standing with other uses, such as: agriculture, industrial and municipal uses. First, we worked to amend the bill; but when unsuccessful, we worked to kill it, resolving to work hard in the interim for good legislation. SB 491 made it through the Senate and to the floor of the House, where, in the final hours, it was not heard and died. With any luck, meaningful instream flow legislation will be introduced in 1991.

CNMA'S DIRECTORY

SB 402- "Agricultural and Natural Land Use Act." This bill, sponsored by the Nature Conservancy, would have allowed private landowners to deed all or portions of their land to a second party for conservation purposes. Seems pretty simple and logical to me, but obviously, not to some members of the Legislature who killed it in the House. Since New Mexico is only one of six states not to allow conservation easements, you can bet that this bill will be back with our full support.

SB 2- "Resource Recovery and Waste Management Act." This solid waste management bill would have provided New Mexico and New Mexicans with much needed protection from the disposal of solid waste. It would have required that landfills be regulated and permitted by the State. Currently, New Mexico is the only state that does not require a permit which allows garbage from any state to be dumped here. The bill also provided for funds to be used by counties and municipalities to design their landfills properly and included extensive recycling requirements. SB 2 had broad-based support, which allowed it to pass through both Chambers of the Legislature, only to have the Governor veto it in the 11th hour. The veto leaves New Mexico unregulated and unprotected. Now, we can expect states from throughout the union to look to New Mexico as a good place to dump their trash.

All in all, the session was an active one, and thank goodness it's over!

Audubon Specials Return to PBS This Summer

PBS will be airing eight Audubon Television Specials this summer on **Sunday nights at 8:00**. Check your local listings for details.

- July 9 Greed, Guns, and Wildlife
- July 16 Grizzly and Man: Uneasy Truce*
- July 23 Whales
- July 30 Crane River
- Aug. 6 Wood Stork: Barometer of the Everglades
- Aug. 13 Messages from the Birds
- Aug. 20 Sharks
- Aug. 27 Sea Turtles
